Finding your shortcuts to eHealth knowledge

This EHTEL - Intel Workshop targets the future of eHealth. It is organised following the Public Consultation of the European Commission on an eHealth Action Plan (eHAP) 2012-2020. This initiative highlights what is needed both at European and Member State level to take eHealth services a significant step forward, i.e. beyond the mere deployment of infrastructures and it supports a long term vision for eHealth in Europe.

EHTEL and Intel jointly belief that eHealth is just one part of a significant transformation of health care provision towards shared care models where citizens and patients actively maintain their health. Thus trust and acceptance of eHealth by its users will be the tagline of this workshop.

The workshop will be hosted by Milan Cabrnoch, MEP.

Programme

08:30 – 09:00	**Registration and Welcome Coffee**
09:00 – 09:15	**Welcome and Introduction** *by Milan Cabrnoch, sponsor MEP*

09:15 – 10:45	**From Experience to Vision: Trusting eHealth** *Chair: Stephan Schug, EHTEL*
Presentations:	***Matthias von Schwanenflügel,*** *German Ministry of Health;* ***Erik Janzon*** *(invited), Chair of the eHealth sub-group of the "Article 29" working party;* ***Michael Wilks****, eHealth Governance Initiative, WP6 Trust and Acceptance;*
Other Panellists:	***Susanna Palkonen****, European Patients Forum (EPF)* ***Pavel Kubu****, Czech National eHealth Forum;* ***Christoph Luykx,*** *Privacy & Security Lead, Europe, Intel Corporation*
Panel Mission:	*Trust and acceptability are crucial for the widespread adoption of eHealth services. Trust interrelates with many factors like the protection of private data, mastery of personal health records, secure transmission of data as well as unambiguous identification of health professionals and citizens/patients. Acceptability is enabled by trust but also includes participation of citizens, patients, health professionals in the design of services, amongst many other factors. This session will explore options that ensure trusted and suitable eHealth environments for Europe.*

10:45 – 11:15	Coffee Break

11:15 – 12:45	**From Vision to Actions: Synergies for the Future of eHealth in Europe** *Chair: John Bowis, former MEP*
Panellists:	***Milan Cabrnoch**, MEP, Czech Republic;* ***Gisele Roesems-Kerremans**, Deputy Head of ICT for Health Unit, DG INFSO, European Commission;* ***Michèle Thonnet** , French Ministry of Labour, Employment and Health, representing the eHealth Governance Initiative;* ***Agneta Granström**, County Council of Norrbotten, Sweden;* ***David Mc Carron,** EMEA Healthcare Director, Intel Corporation;*
Panel Mission:	*What conclusions can be drawn from the EC consultation on appropriate activities up to 2020? What synergies can be established for the future of eHealth in Europe? How to relate the joint visions about trusting eHealth in concrete actions? Are the necessary domains that have been mentioned in the EC consultation process the only ones to prioritise? How to manage comprehensively the health-related EU flagship initiatives and the necessary milestones for eHealth? Where to go from here? This panel will look at the desired state of eHealth in the year 2020, and analyse the actions required to get there.*

12:45 – 13:00	Wrap-up and conclusions
